

step1

step2

combine

all

```
graph TD; step1 --> combine; step2 --> combine; combine --> all;
```

A flowchart with four rounded rectangular nodes. At the top left is a green-outlined node labeled 'step1'. At the top right is a cyan-outlined node labeled 'step2'. In the center is a yellow-outlined node labeled 'combine'. At the bottom is a red-outlined node labeled 'all'. A gray arrow points from 'step1' to 'combine', and another gray arrow points from 'step2' to 'combine'. A third gray arrow points from 'combine' down to 'all'.
